# Reading Comprehension / Unseen Passage

Read the short passage and answer the questions.

# Butterfly on a Petal

Mia went to the park outside her house. In the park, she saw a very pretty butterfly. The butterfly was blue and yellow in colour. It was sitting on a white petal.

Soon she saw that there were four more butterflies. One other butterfly was black and white. When she went to touch this butterfly, it flew away. This made Mia jump a little. The butterfly went and sat under a tree. Mia ran down to the tree, but by then it was gone. She tried to follow it, but couldn't find it again.

Mia soon left for home. When she reached her house, she was surprised to see the butterfly sitting by her window. This got a smile on her face.

#### Answer the following questions:

- 1. What were the colours of the butterflies?
- What happened when she went to touch the butterfly?
- 3. Where did the butterfly go and sit?
- 4. Why was Mia surprised?

Q2: Read the passage and answer the questions:

# Grade 4 English Comprehension Passage

Read the passage and answer each question.

#### The Desert

A desert is a very dry barren land. Deserts get less than 25 centimeters of rainfall each year. They cover about 33% of land area on the Earth, Deserts are mainly found in Western parts of America, Central Austrafa, Western Asia and North and South Africa.

Deserts can either be hot deserts or cold deserts. Hot deserts are covered with sand, rocks, hils and even mountains. The largest and hottest desert in the world is the Sahara desert in North Africa. The driest desert in the world is the Afacama Desert in South America.

Cold deserts are called 'Tundra' and are covered with snow or ice. Cold deserts are also called 'Po'ar deserts' because they can be found close to the North and South poles. The Himalayas also have cold deserts which are known as 'Montane deserts', Antarctica is the world's largest cold desert.

There are very few animals that can survive in the desert. Came's, snakes, Izards, gazallas, foxes and some types of door are a few of these animals. Rodents and lizards dig a burrow for themselves in the sand. These help them escape from the hot rays of the sun. Camels also store water in their humps. Only plants that have thick and fleshy stems like a cactus exist in deserts. The cactus stores water in its thick stem.

Many deserts are extremely hot during the day and have cold nights. Dust or sandstorms can also take place when the wind blows loose sand from the surface.
